FOR IMMEDIATE RELEASE

August 5, 2021

EAST HAMPTON ASKS RESIDENTS, WORKFORCE, VISITORS TO TAKE “WIRELESS INFRASTRUCTURE” POLL

Poll seeks info on cellular network coverage, concerns and preferences regarding wireless infrastructure facilities

Results will inform draft Wireless Master Plan to guide development of the wireless network in East Hampton Town

In recognition of the growing demands on wireless/cellular services and the need for an improved wireless network, in September, 2020, East Hampton Town issued a request for proposals for a consultant to analyze the existing network created by personal wireless carriers, assess infrastructure needs, and recommend potential solutions.

CityScape Consultants was engaged to conduct the research and draft a Wireless Master Plan that will guide the development of the wireless network in East Hampton Town and update the Town Code to reflect current conditions and federal guidelines.

The consultants are also providing support services to the Town Board and Planning Board as they consider applications for wireless service facilities.

In December, 2020, a Wireless Telecommunications advisory committee comprising local residents and Town staff was appointed and has worked with CityScape to develop the Wireless Infrastructure Poll.

The poll is available in both English and Spanish at the following link, and may be completed anytime before Aug. 22.

Only one poll per person should be submitted, please.
